Your finish time: Wed May 29 14:52:29 2024
```

A screenshot of a terminal window with a dark background. The title bar at the top shows "tnh47@Nhat: ~/UIT/Ky4/LTH1" followed by standard window control icons. The main area displays a hex dump where each line contains two rows of hexadecimal values. The first row of each pair consists of uppercase letters 'A' (representing 0xAA) and ends with '4E 48 41 54'. The second row starts with several '00' values, followed by 'C6 A4 57', and then more '00's. On the left side, there are vertical markers consisting of tilde (~) and less-than (<) symbols. At the bottom, a status bar indicates '"byte_code" 1L, 144B' on the left, '1,143' in the center, and 'All' on the right.
